Subject: Microsoft Settlement

I would like to inform you that I am displeased with the settlement brought about against Microsoft. In fact, 'against' almost feels like the wrong word. As it is worded now, the settlement proposed could actually help microsoft retain their monopoly for future years.
I agree with the statements laid out on this page: <http://www.kegel.com/remedy/letter.html> and feel that at least a few, if not all of these items be considered when there is to be a new proposed settlement against microsoft.

In this time of economic downturn, we can not let a monopoly to continue to stife the market and overcharge for services.

Thank you for your time.
